1. Juggling cards using any kind of object
2. Doing a handstand with a long piece of string tied around your ankles
1. Telling stories with puppets
2. Telling stories with puppets with different props
3. Telling stories with puppets and props
The average duration of a session at The Little Gym is 60 minutes. At The Little Gym, parents are given a brochure of activities and they can select an activity. During the 30 minutes of a session, 4 minutes are devoted to each session. During this period, activities are presented by the program director, one at a time, and in a counter-clockwise pattern. In our experience, approximately 5--10 activities can be accommodated in 30 minutes. The program director selects activities which are suitable for the child's age and developmental stage. Parents may select any activity during the session that they think is appropriate for their child. If a child wants to do something that is not part of the program, the program director will redirect the activity. Informed consent and assessment {#Sec7} ----- The research coordinator introduces the study to the parents of the participating children in the center. Informed consent is obtained from the parents of the children. The parents are given the choice of signing the consent form with their child present, or signing it separately, after which the child is not required to participate in the study. Assessment is conducted by parents and a research coordinator. The assessments are completed at home and a brief summary is provided to the parent in their child's session. These assessments include the Early Childhood Behavior Questionnaire (ECBQ) \[@CR10]\ and the Strengths and Difficulty 82157476af
